**CAUSE NO. 41535**

You are hereby notified that on this date the Indiana Utility Regulatory Commission has caused the following Docket Entry to be made:

On June 14, 2001, the Commission entered its ORDER ON AREA CODE RELIEF FOR THE 219 NPA, which Order is in the words and figures as follows:

(H.I.)

That Order, at finding 6A, set forth the factors the Commission considered in formulating its area code relief for the 219 NPA. Those considerations included, in part, preference of customers, public reaction and involvement in boundary decisions, geographic identity, public familiarity and community interest, and customer confusion and inconvenience. Additionally, the Commission considered rate center distribution, unique demographics and population density, access lines, wireless code assigned, and relative size of the areas divided.

Upon further reflection and study, and in response to published public comment, the Commission concludes that it is in the public interest to modify its Order of June 14, 2001, pursuant to IC 8-1-2-72, in order to amend, through minor adjustments, the areas divided into NPAs 219, 574, and 260. These modifications make final adjustments in consideration of the factors previously cited together with public comments received, and the Commission's review of time zone divisions in the 219 NPA.

Therefore, the Commission determines that it will, following a reasonable period of notice and opportunity to be heard, modify its Order of June 14, 2001, to adopt the attachment hereto identified as "219 NPA Geographic Split-Alternative Number 4-B".

Any party of interest, may file its formal request to be heard on this modification on or before 5:00 p.m., EST, Monday, October 1, 2001.
